

Covid-19 Status Update

As a result of the recent government announcement and the unforeseen circumstances we are now faced with, SSP have taken the necessary precautions and implemented operational changes in order to ensure the safety of the entire workforce whilst still remaining fully operational.

These changes are currently not affecting our day to day operations and we are fully committed to ensuring we continue to maintain our usual level of support and delivery performance whilst guaranteeing our strict high level of quality.

All changes made are in accordance with strict Government guidelines and we will continue to follow, very closely, any further instructions given and advised, ensuring these are adhered to at all times.

As a supplier of essential products to market sectors including Medical and Healthcare, Food and Dairy, Utility Providers, Pharmaceutical, Aerospace and the MoD we need to ensure continuity of supply and manage the expectations of our customers. This will, of course, be our key focus at all times as will ensuring the wellbeing of our staff and supply partners helping to ensure we all remain safe and well.

Should any further Government measures and advice impact on our ability to maintain our chain of supply we will inform you as soon as we possibly can.

May we take this opportunity to thank you for your support and patience during these very difficult times and wish you and all your colleagues the very best of health.

Yours sincerely,

Keith Parker
Q.A. Director
